# Inclusive Approaches in Educating Children and Students

International Scientific Conference

## *Conference Theme and Aims*

The conference deals with the issues of the support of inclusive education in nursery and primary school as well as out-of-school education. The conference intention is to create space for scientific discussion about the implementation of inclusive education. The discussion will be based on the results of important researches and empirical experiences of the participants of the conference. The main aim of the conference is the analysis of the possibilities of inclusive education in nursery and primary school.

## *Contributions on these topics are welcome*

- The state, processes, transformation and possibilities of inclusive education in nursery and primary school.
- The support of inclusive education in out-of-school education.
- Pregradual education of pedagogical and professional staff to implementation of inclusive education.
- Innovation of the content of education of pedagogical and professional staff in the frame of lifelong learning in the field of inclusion at school.
- Inclusive approaches in special pedagogical diagnostics.

## *Sections*

1. Inclusive approaches in education of children in nursery school
2. Inclusive approaches in education of pupils in primary school
